### Message from Council of Patrons & Advisers, CPTM Fellows and Fellows Emeritus

Global 2011 (LID), Putrajaya, 19 – 21 June 2011

**(as outlined by Lord Craig and introduced by Sir Martin Laing)**

At the conclusion of the Smart Partnership Langkawi International Dialogue, I have the honour of presenting on behalf of CPTM Fellow and Fellow Emeritus attending LID 2011, a message to all Smart Partners.

We record:

- Our sincerest appreciation and warmest thanks to our Host Patron and Adviser, the Rt Hon Dato' Sri Mohd Najib Tun Abdul Razak, the Prime Minister of Malaysia for welcoming all the participants to Malaysia, and for his inspiring and thought provoking speeches which were most warmly received.
- Our grateful thanks for the very strenuous efforts and hard work of all those in Malaysia who so successfully ensured that the many preparations for the actual Dialogue achieved the purpose of LID 2011. Our admiration also for the delightful variety and skills of the dancers and musicians who so ably reflect the multi-cultural inheritance of today's Malaysia.
- Our appreciation of the assistance provided by private sector organisations in Malaysia whose commitment to Smart Partnership is so valuable and recognised by all participants.
- Our thanks to the many government and non-governmental organisations and their staffs for the great variety and value of their many carefully presented displays and exhibits laid out at Putrajaya International Conference Centre!
- Our recognition of the great value of the Smart Partnership concepts of forward looking inclusive Visions for embracing the spirit of change for promoting national growth and socio-economic transformation. The best example of this is the "1Malaysia" which is the Smart delivery of Vision 2020.
- Our view that Visions are dynamic and need to be reviewed regularly and developed without excluding considerations of risk factors that must be avoided or dealt with successfully if the Vision is not to be distorted or derailed, in an uncertain world where financial and political challenges may lead to global instability, the task of those managing future work on Visions become more complex and demanding.
- That even in the industrialized countries there can be no certainty of lasting continuous healthy growth for people or their socio-economic environment.

2/-

- The importance of stable government as a key factor in preparing and advancing National Visions.
- The value of regional alliances, using their collective strengths to unite in achieving growth and for transformation as an additional approach in the work of Smart Partnerships.
- The longer term needs, such as making provision for low cost house mortgages and pensions that provide individuals and families with realistic opportunities to better their living standards and provide for retirement and old age.
- That other financial initiatives that seek to combine public and private funds are of value in promoting socio-economic growth and poverty reduction. This was a special area of expertise needing regular exchange between stakeholders to provide new resources for essential development funds.
- Our admiration for the continuing enthusiasm and commitment of Smart 29ers on whose young shoulders the long term life and success of Smart Partnership will rest.
- Our intention to bring the value and successes of the CPTM Smart Partnership Movement to the attention of Heads of State and Government at the forthcoming CHOGM in Australia.
- The Rt Hon Dato' Sri Mohd Najib Tun Abdul Razak, Prime Minister of Malaysia & Host Patron & Adviser of LID 2011 has been elected a Fellow of CPTM. He was warmly welcomed and thanked for his keen interest and support for Smart Partnership.

[ As Host Patron & Adviser of LID 2011 and a new CPTM Fellow, Prime Minister of Malaysia made a final passionate remark emphasising the importance of the Smart Partnership spirit for Transformation and also announcing the next International Smart Partnership Dialogue.]
